

Route 126 Committee announces website

The Route 126 Committee has announced the official launch of its new website at www.126info.ca on June 4.

Committee president Patrice Finnigan said the committee hopes the site will become an often used tool to connect the exist-

ing communities along route 126, as well as all the users who travel the route, adding the website will be a place where readers will be able to obtain information, share comments or concerns, or simply share travel experiences with other users.
